REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
 - With regard to claim 1, as the closest reference on record, Boutaghou et al (US 6,275,454) shows an optical pickup head of an optical recording reproducing apparatus including: a slider installed so as to be slidable along the surface of an optical disk and having a convergence lens at a side for focusing light; and a micro-actuating means installed so as to be laminated with the slider in order to adjust an optic axis of the convergence lens minutely; **but fails to show** a lower fixed body installed at the top of the slider, having plural lower fixed electrodes on the inner circumference at regular intervals; an upper fixed body installed at the top of the lower fixed body so as to be corresponded to a shape of the lower fixed body and have plural upper fixed electrodes on the inner circumference at regular intervals; an insulating layer interposed between the lower fixed body and the upper fixed body; a moving body installed so as to be corresponded to the lower and upper fixed bodies, moving in the optical axis direction and having a moving electrode at the outer circumference arranged alternately between the lower and upper fixed electrodes; and plural electrode pads for supplying power to the lower fixed body, the upper fixed body and the moving body in order to driving the moving body.
 - Applicant asserts: the present invention provides an optical pickup head of an optical recording reproducing apparatus capable of being miniaturized and reducing a fabrication cost by using a MEMS (micro electro mechanical system) technique used for designing, fabricating and application of a microstructure (Specification, p. 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
